

Changes in the Health of the Bay over Time

* source: Chesapeake Bay Foundation – 2007 State of the Bay Report

This graph shows changes to the health of the Chesapeake Bay. Projections for restoration of the Chesapeake Bay are shown on the right side of the graph following the dotted line. This graph was published by the Chesapeake Bay Foundation as part of the 2007 State of the Bay report. The goal is to reach a score of 40 for the Chesapeake Bay by the year 2010. The Chesapeake Bay Foundation has set a score of 70 as indicating that the Chesapeake Bay has been restored or “saved”.
